

SkyGuard 3G Interactive Gateway Module

Don't let existing accounts with aging systems disappear. Retain your accounts by upgrading them to full interactive services. Simply add the SkyGuard Interactive Gateway Module (IGM) to a Paradox™ MG5050, Honeywell Vista™, DSC PowerSeries™ or NX® panel. Unlike other 3G modules, the SkyGuard IGM provides smart phone-based security and Z-Wave home automation control of locks, lights and appliances. Keep your existing accounts healthy and active with new technology from Inner Range.

The SkyGuard IGM incorporates a toggle switch allowing the technician to field configure the device based on the type of system it is installed on. This minimizes inventory requirements for the dealer and technician vehicles

- New services to existing customers without replacing the panel
- Reduced account attrition rates
- Control locks, lights and appliances from the SkyGuard app
- Connects to the panels keypad bus
- Enables remote user programming, control, Central Station reporting and push notifications

Key Features

Complete home automation services through Z-Wave connected devices

Full Smart Phone and Tablet security on Apple & Android platforms (iOS 5.1 & above, Android 3.0 & above, Windows 8.0 & above) and home automation for existing panels

Field configurable for panel compatibility. Full central station reporting to any Multipath-IP enabled Monitoring Centre.
