Installation Manual

TM70

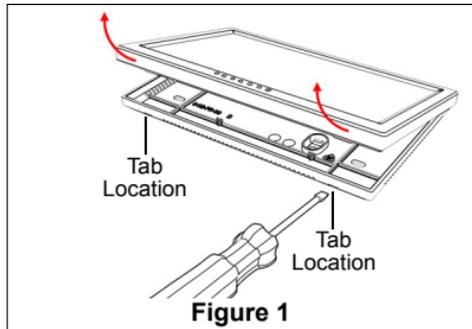

TM50

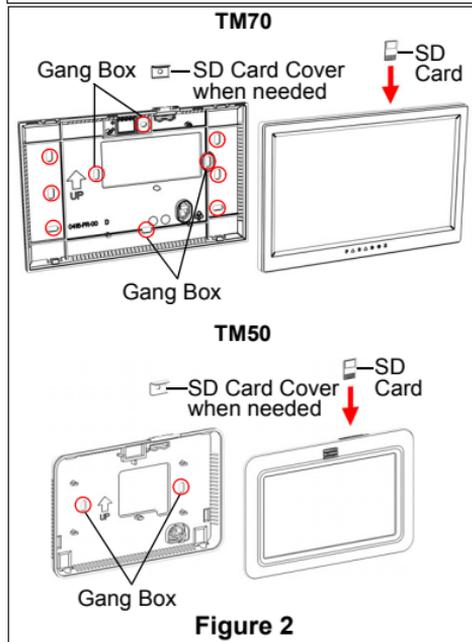

## Installation

1. Separate the top assembly from the back plate. Insert a flathead screwdriver into the tab located, as shown in Figure 1.

2. Mount the back plate to the wall or to a gang box using appropriate screws. Ensure that the UP arrow on the back plate is in the up position.

**Note: We recommend to feed the TM70 with 18 gauge wire.**

3. Make sure the SD card is installed properly and locked with text facing backward to wall/connections facing to the front, as shown in Figure 2.
4. Secure the wire plug to the PCB socket the wires as per the color code to match the Paradox keypad bus code. The blue wire is keypad zone input.  
**Note:** We recommend to feed the TM70 with 18 gauge wire.
5. Attach the SD card cover if needed, then attach top to back top hooks first then lock the bottom as per Figure 1. The SD card can be removed if necessary with a flat screw from the top if the metal cover is not attached or by opening the keypad for loading pictures.
6. Power up the bus and verify that the voltage is higher than 11.5V (displayed at the bottom right of the main screen as well as the boot sequence screen).
