

Dealer Services

June 2024 - Australia

Inner Range offer a powerful range of communications options including 4G data services, smartphone app remote control and app-based notification services using the Inner Range cloud.

To obtain a free SkyCommand Dealer account for your security installation business you can sign up for a dealer account instantly by registering online at: <https://skycommand.com/skycommand/dealersignup>

SkyCommand App subscriptions

A SkyCommand App subscription can be applied to any Inception or T4000 device through the SkyCommand Dealer portal.

The SkyCommand app offers end users fully interactive control of their Inception systems as well as flexible notifications through its push notification service.

A T4000 or Inception can be enhanced by applying an App subscription to enable notifications and increase the number of SkyCommand user accounts.

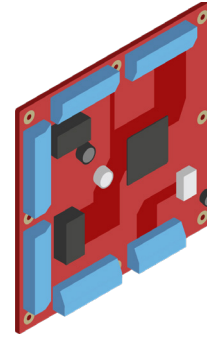

Plan	Inclusions	Price Per Month Ex GST
Free	Up to 10 User Accounts Remote Control	\$0 Per Month
Basic	Up to 20 User Accounts Remote Control Push Notifications Email Notifications	Contact Wesco Anixter Security Branches for pricing

Enterprise	Up to 500 User Accounts Remote Control Push Notifications Email Notifications	

SkyCommand Dealer Services

Integrati Software App subscriptions

The SkyCommand app offers end users fully interactive control of their Integrati systems as well as flexible notifications through its push notification service.

By adding an app subscription through the SkyCommand Dealer portal to an Integrati system, users can control area's, doors and outputs and well as receive push notifications to their smartphones.

Plan	Inclusions	Price Per Month Ex GST
Basic	Up to 20 User Accounts Remote Control Push Notifications (max 5000 per month)	Contact Wesco Anixter Security Branches for pricing
Premium	Up to 100 User Accounts Remote Control Push Notifications (max 10,000 per month)	
Corporate	Up to 500 User Accounts Remote Control Push Notifications (max 50,000 per month)	
Enterprise	Up to 1000 User Accounts Remote Control Push Notifications (max 100,000 per month)	

Standalone T4000 App subscriptions

The T4000 can be used as a standalone communications device where professional monitoring is not required by the end client.

By adding an app subscription or router plan to a T4000 through the SkyCommand Dealer portal the T4000 will provide an internet connection for remote management of security systems or remote monitoring through the SkyCommand push notification service.

Plan	Inclusions	Price Per Month Ex GST
Basic	Ethernet Connectivity Up to 20 User Accounts Remote Control Push Notifications Email Notifications	Contact Wesco Anixter Security Branches for pricing
Basic + Single SIM	Ethernet + Single SIM Connectivity Up to 20 User Accounts Remote Control Push Notifications Email Notifications	
Basic + Dual SIM	Ethernet + Dual SIM Connectivity Up to 20 User Accounts Remote Control Push Notifications Email Notifications	
Premium	Ethernet + Dual SIM Connectivity Up to 50 User Accounts Remote Control Push Notifications Email Notifications	
Enterprise	Ethernet + Dual SIM Connectivity Up to 500 User Accounts Remote Control Push Notifications Email Notifications	

T4000 Router Subscriptions

The T4000 is capable of routing IP data over wireless cellular networks, allowing system integrators and end clients to remotely manage their security systems on sites that do not have local hardwired internet connection.

A router plan can be applied to both monitored and standalone T4000's providing 4G data allowance as per the below table.

Simply connect your Integriti or Inception controller to the T4000 using a straight through Ethernet cable and then apply a data plan to the T4000 via the SkyCommand dealer portal. The T4000 will route the panels SkyTunnel connection to the Inner Range SkyTunnel server, allowing any user with sufficient security permissions and an internet connection the ability to connect to the panel remotely.

Plan	Description	Price Per Month Ex GST
100MB	Ideal for Inception systems requiring web access for control, user management and occasional maintenance.	Contact Wesco Anixter Security Branches for pricing
500MB	Ideal for Inception systems requiring frequent web access for user management and maintenance. Suitable for small Integriti systems requiring remote access for basic control, simple user management and occasional maintenance.
